Resident of Shoe-String Irate Over Long Delay

An appeal for action to remedy jurisdictional problems in the Los Angeles 'shoe-string' area will be made by residents aroused over a lengthy delay in receiving assistance Friday.

What triggered the concern was the near-death by asphyxiation of two youngsters, Walter Erickson, Jr., of 1650 W. 215th St., and his friend, Michael Edmunson, of 1663 W. 215th St., both 3½, by asphyxiation.

After waiting considerable time for emergency equipment, the fathers of the two boys rushed them to Harbor General Hospital, where they were revived with oxygen.

Walter's father, and Al Sanders, a bakery salesman, applied artificial respiration to the two boys from the time they were discovered unconscious in a trailer, until they reached the hospital.

Residents of the area claim that it took at least 20 minutes before the first rescue equipment arrived. By that time the

of the Torrance Coordinating Council, and herself a resident of the "shoe-string" called for some action to bring better protection to the strip.

"You feel that when you're so close to Torrance and need some oxygen, something should be done," she said.

The Erickson home where the accident occurred is located half a block from the Torrance city limits.

She said that prompt action should be taken so that better service can be obtained for resi-

Harbor General Preliminary Plans Get Approval

It will take another eight months before working plans for Harbor General Hospital buildings are completed.

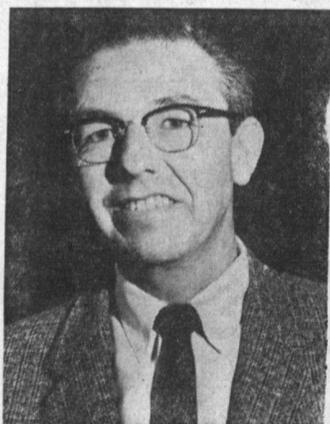

The Board of Supervisors Tuesday approved preliminary plans for the \$15,000,000 construction of an acute patient unit, eight stories high, and a two-story wing as well as an outpatient-clinic.

Architect Welton Becket said he could complete the working drawings in eight months.

Most of the construction will be financed from a 1956 bond issue approved by the voters.

The long delay in construction has been under attack from Supervisor Kenneth Hahn.

WHAT'S DOING

R. S. Pyle, your Telephone Manager in Torrance

Wherever your voice goes, telephone patrols keep a careful watch over the lines that carry your calls. And here you see a sky patrol in action. Every day the pilot or his partner check 350 miles of cable, most of it underground. They're on the lookout for landslides or construction work that could cause trouble. By using a loudspeaker on the plane, or by dropping notes, they can warn anyone working near a hidden cable. Time and again, cable patrols have headed off costly damage. And they've helped make your telephone service more dependable than ever.

PLACE CHRISTMAS CALLS EARLY

We will be busier than ever this Christmas. There are bound to be some delays . . . and many Long Distance calls to the East won't be completed.

Don't disappoint your folks back home. Use three "Telephone Tips":

1. Plan to talk before Christmas Eve or after Christmas Day.
2. Place your call by number . . . Get it in advance if possible.
3. If you have "Direct Dialing" service, help speed up your calls by dialing direct.
